The Agricultural Education Mission

Agricultural Education prepares students for successful careers and a lifetime of informed choices in the global agriculture, food, fiber and natural resources systems.

We strive to develop a classroom of cooperative learning. Where students are given the opportunity to work with each other and learn at the same time. Our goal is to give students hands on experiences and relate lessons to real world experiences. *We want students to realize how agriculture is tied to their lives.*

The FFA is the National Organization for Agriculture Science students. The Eustace FFA Chapter has approximately 120 members and is very involved in FFA activities. Some of these activities include: animal projects, judging teams and community projects.

Our hopes are to involve students in activities that will enrich their lives and help them to develop into the leaders of the future.
