## **World Geography**

*Coach Tardiff and Coach Duncan*

Students in World Geography will study the world and its people, places and environments – where they are and how they relate to one another. They will learn about the earth's physical environment and how it affects human life, such as its impact on where people live. Students will also learn about the types of human activity – political, economic, and social, and how they shape cultural patterns and affect the environment. Overall, they will examine the world from a geographic perspective, using problem-solving skills and concepts such as location, movement, and region to ask and answer geographic questions.
